Professional Summary

Passionate Web Developer with a strong foundation in both front-end and back-end technologies, specializing in React and ROR. I excel in transforming complex requirements into intuitive, user-friendly interfaces and efficient APIs. I have hands-on experience in building dynamic platforms that solve real-world problems. Constantly learning and staying up-to-date with the latest technologies and trends in the industry to ensure that my work is always of the highest quality. Excel in collaborative environments and excited to contribute to dynamic projects while constantly evolving and improving.

Work Experience

CodingCops	Lahore, Pakistan
ROR and React Developer (Associate Software Engineer)	Nov 2024 – Present
- Designing and implementing robust APIs in Ruby on Rails, ensuring smooth data flow between the back-end and React front-end applications. - Collaborating with team members to troubleshoot and resolve issues, utilizing Jira for efficient bug tracking and task management. - Developing and optimizing dynamic React components to deliver high-quality user interfaces with enhanced performance. - Contributing to daily stand-ups and team meetings to share updates, discuss challenges, and ensure alignment with project goals and deadlines.	
Askus Solution	Faisalabad, Pakistan
React and Django Developer (Associate Software Engineer)	June 2024 – Nov 2024
- Developing APIs using Django REST framework, ensuring seamless integration with frontend applications. - Translating Figma designs into responsive and dynamic UI components using React, TypeScript, and CSS. - Resolving bugs reported by users or the quality assurance team, enhancing overall software performance. - Participation in daily and weekly meetings to provide project updates and align on objectives.	
Codiux	Remote
Front-End Developer (Intern)	July 2023 – Sep 2023
- Transformed Figma designs into intuitive web applications with React, ensuring responsiveness on all devices. - Effectively collaborated with the development team, utilizing Git and GitHub for code management, and actively contributing to daily meetings for updates and issue resolution. - Worked closely with the backend team to seamlessly integrate frontend and backend functionalities, ensuring clear communication and alignment of project objectives.	

Selected Projects

TurboLance	React, Node, Express, MySQL, MVC
TurboLance is an innovative freelancing platform designed to offer a transparent, fair, and secure environment for both clients and developers. The platform allows clients to choose developers based on their profiles and skillsets, while ensuring pricing fairness through controlled hourly rates. By providing detailed client profiles, TurboLance helps developers make informed decisions, while fostering trust and transparency. The platform enhances user satisfaction by offering a user-friendly interface and reliable project management features for both developers and clients.	
PakCovid Insight	Ejs, Node, Express, R, MVC
- Built a dynamic website to visually represent Covid-19 trends, utilizing robust data analysis. - Used R language for comprehensive data analysis, ensuring accurate insights derived from the dataset. - Implemented interactive features to engage users and facilitate understanding of the evolving Covid-19 situation in Pakistan.	
ShopLink	React, Node, Express, PowerBI, NLP, MySQL, MVC
- Developed and implemented a centralized web platform, empowering shop owners to efficiently manage multiple branches, monitor stock levels, track sales, and streamline workforce management. - Integrated innovative CV parsing functionality into ShopLink, utilizing NLP API to extract and visualize applicant skills, enhancing the hiring process for shop owners and managers. - Seamlessly integrated Power BI to generate visualizations illustrating sales trends and profitability metrics, empowering owners with valuable insights for data-driven decision-making and sales report creation.	

Skills

Web Development (ROR, Node JS, Express JS, React JS, SQL, MySQL, MVC Architecture, EJS, AJAX, Rest APIs, Tailwind CSS, PostgreSQL, Django, TypeScript)

Programming Languages (C++, C, Python, Assembly, JavaScript)

Tools (Ubuntu, VSCode, PyCharm, Android Studio, Visual Studio)

Education

National University of Computer & Emerging Science, B.S Computer Science

2020 – 2024

CGPA: 3.08/4

Relevant Coursework (Data Structures, Database Systems, Software Design & Analysis, Artificial Intelligence, Web Programming)
